A DOZEN GOOD REASONS WHY THE 404 SERIES IS YOUR BEST BUY IN MOBILE COMMUNICATIONS MICROPHONES

- 1. World Famous "Controlled Magnetic Cartridge"**—Field-proved throughout the world under extreme conditions of military and commercial use.
- 2. Corrosion Proof "Armo-Dur" Housing**—Immune to severe weather conditions. Unaffected by corrosive materials normally encountered or used: oils, grease, fumes, salt spray, etc.
- 3. High Impact "Armo-Dur" Housing**—Has high elasticity limits. Resists extreme mechanical shocks and retains original shape.
- 4. Constant Impact Strength**—Withstands mechanical shocks under varying conditions of temperature — with uniform impact resistance. (Varies only 25% in impact strength through a range running from -40° to 165° fahrenheit — as compared to a variance of 95% for standard die-cast housings.)
- 5. Eliminates Shock Hazard**—Special "Armo-Dur" housing is an insulator — eliminates electrical shock hazard.
- 6. Reduces Operator Fatigue**—Under actual operating conditions, the complete microphone (including plug and cable) weighs only 8

oz., 42.9% less than similar die-cast microphones. The net weight of the microphone, plug, and cable is 12 oz., 33.3% less than similar die-cast microphones.

- 7. No Vibration Fatigue**—"Armo-Dur" eliminates shattering, breaking or cracking of housing often caused by continuous vibrations.
- 8. Color Permanence**—Color runs throughout the "Armo-Dur" housing. It is unaffected by handling, sun and corrosive fumes or materials which are normally encountered or used.
- 9. Low Thermal Conductivity**—Feels normal to the hand in extreme heat or cold.
- 10. "Life-Time" Hang-Up Button**—Unique shock mounting prevents button "pull out".
- 11. Fully Shielded**—A high permeability shield and the vacuum metalizing on "Armo-Dur" case provide effective shielding against electro-static and magnetic fields.
- 12. No Sacrifice of Quality For Price**—Rigid laboratory and field tests on every component insures long-life trouble-free service.

HERE'S PROOF OF ITS RUGGEDNESS

... dragged behind swiftly moving autos:

It is estimated that the Model 404 Microphone withstood over 35,000 separate shock-impacts during a 3.3 mile test drive at a speed ranging from 20 to 30 miles per hour. This is far greater punishment than would ever be required of a microphone in a lifetime of abnormally severe handling.
