

NEW

GOLDEN VALUE FEATURES

"K" FEATURES LIKE THESE PUT OLD TIME FUN, OLD TIME PROFITS, BACK INTO MUSIC.

New STYLING Features Excite Interested Attention

- Low, slim, sculptured profile
- Bright accents of chrome and satin finish metals.
- Golden glow Panel-light
- Dirt-defying sable black metallic grille
- Sceptre shaped grille guards
- Reflecting color spectrum on grille and guards
- Illusion pattern side-panels

New PLAY Features Sell More Music to More People

- King size push buttons; big, easy-to-read numerals and letters
- Full view program display with fully classified categories
- Directed "down-beam" glare-free lighting
- Ultra-fast, direct-response circuitry
- Variable crediting for almost every coin combination

Plus high fidelity, multi-horn sound in magnificent monaural or exclusive 3-channel stereo — the greatest!

New PERFORMANCE Features Produce Greater Income for Operators

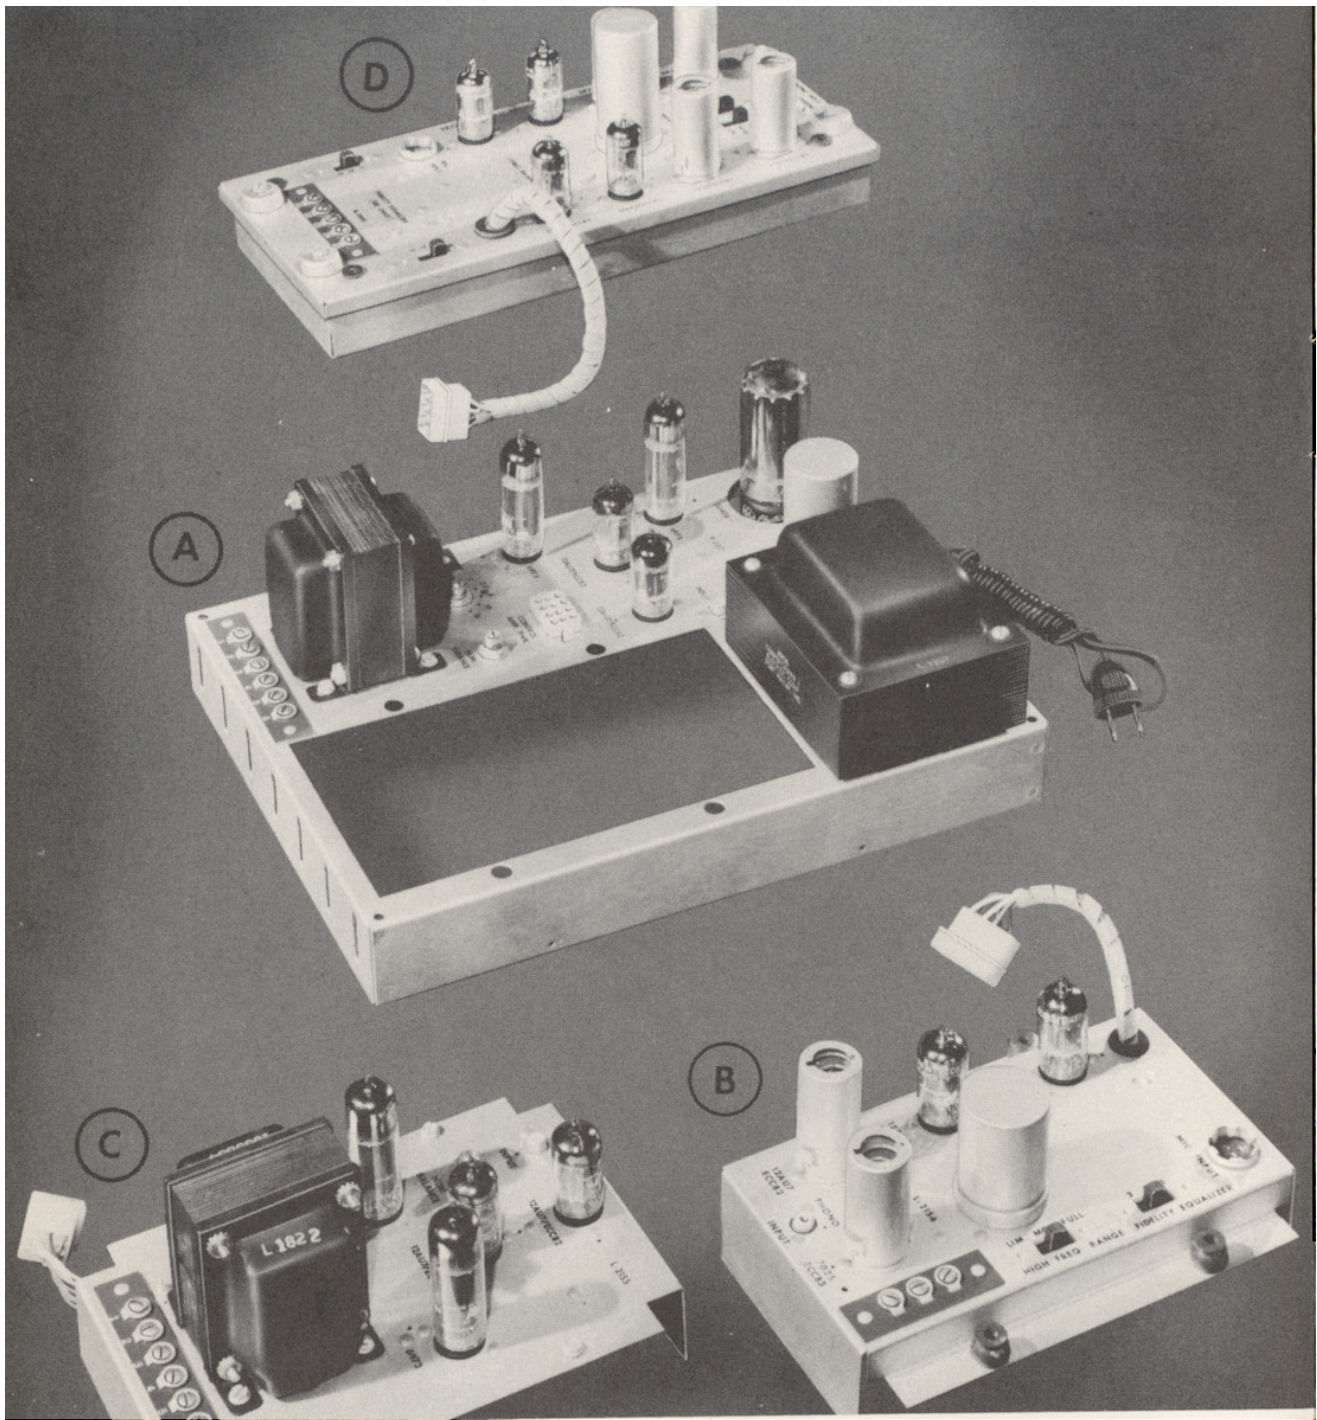

The outstanding design, engineering and manufacturing developments incorporated in the new Model "K" contribute significantly to profitable route operation. Each of them can add appreciably to income, can substantially reduce costs. They are detailed in the pages following.

AMI MODEL "K" JUKEBOX
33" WIDE, 28" DEEP, 5' HIGH
WEIGHT 405 POUNDS

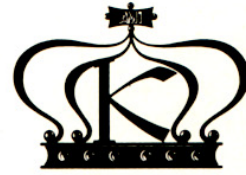

NEW MULTI-USE AMPLIFIER

Adapts Instantly to Any Sound Requirement

For the first time you have the adaptability and economy of a high output, distortion-free amplifier whose four optionally available, quality components allow you to change from monaural to stereo, or from stereo to monaural, right on location with plug-in simplicity. Mounted on rear door for convenient accessibility.

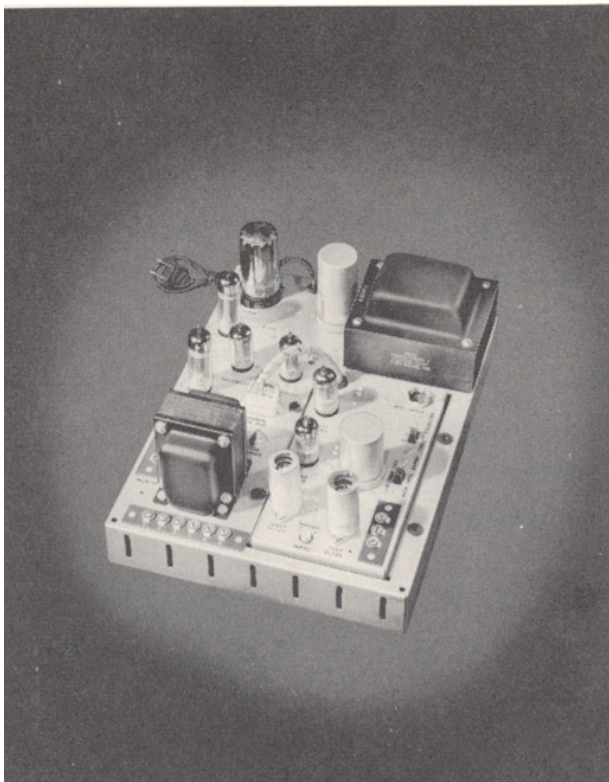

ULTIMATE IN INTERCHANGEABILITY

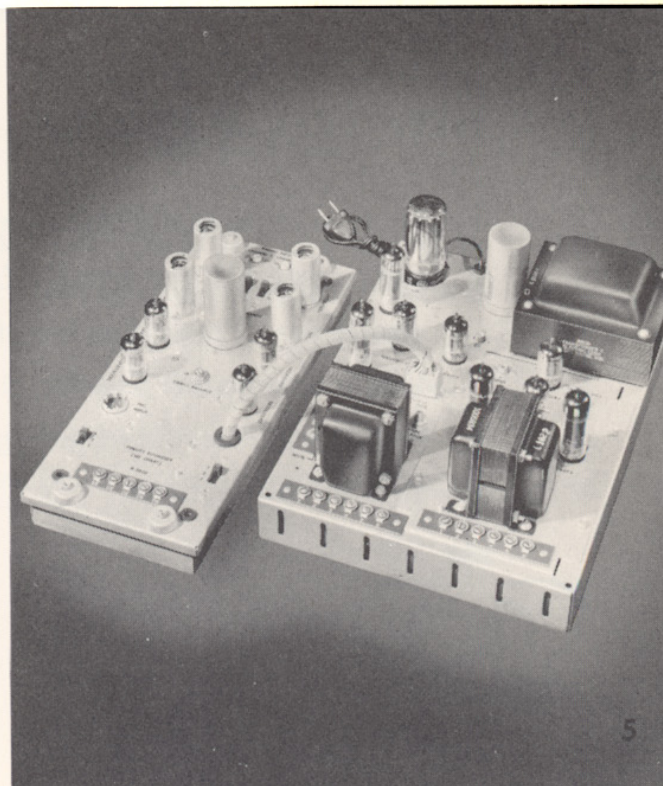

- A. *Basic Power Amplifier Chassis*
- B. *Plug-in Monaural Control Amplifier*
- C. *Plug-in Stereo Power Amplifier*
- D. *Plug-in Stereo Control Amplifier*

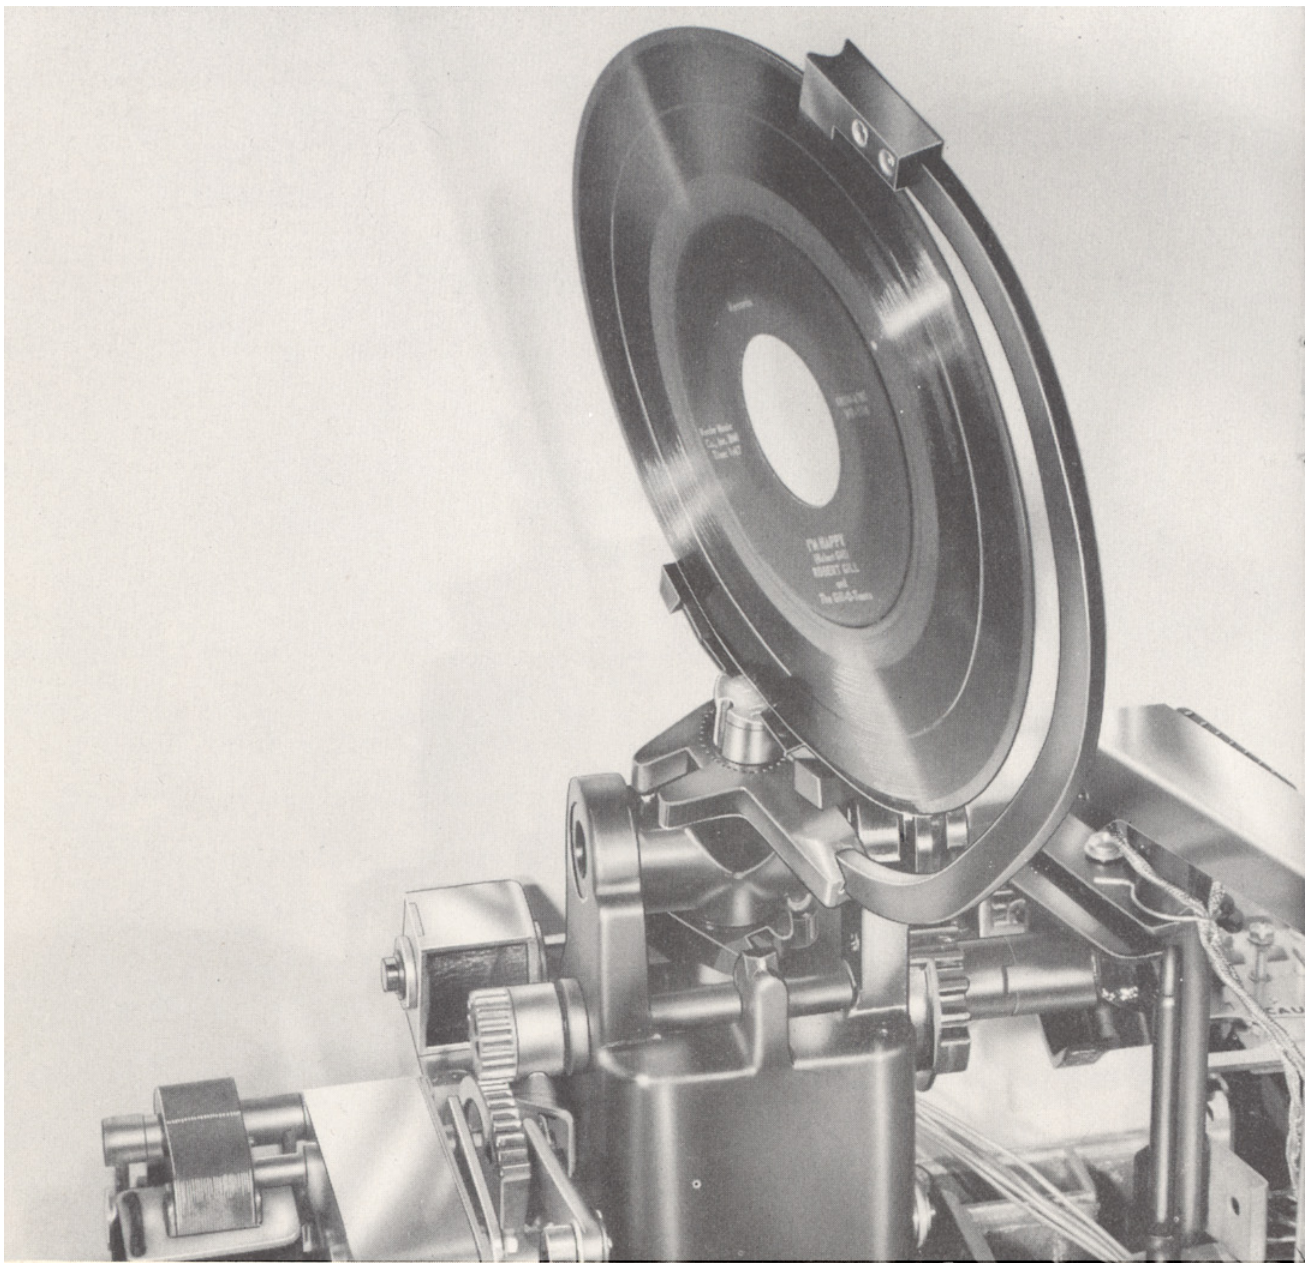

Basic power amplifier provides three-position scratch filter and hi-fidelity equalizer controls for finest reproduction at high or low volume in any surroundings. Built-in Automatic Volume Control. Only four basic tube types. Monaural music power output, 27 watts with less than 2% H.D. (I.H.F.M. Standards); stereo, 54 watts. Frequency response, 8 cps. to 28,000 cps. ± 5 DB., 1 watt level.

MONAURAL SET-UP (A+B)

STEREO SET-UP (A+C+D)

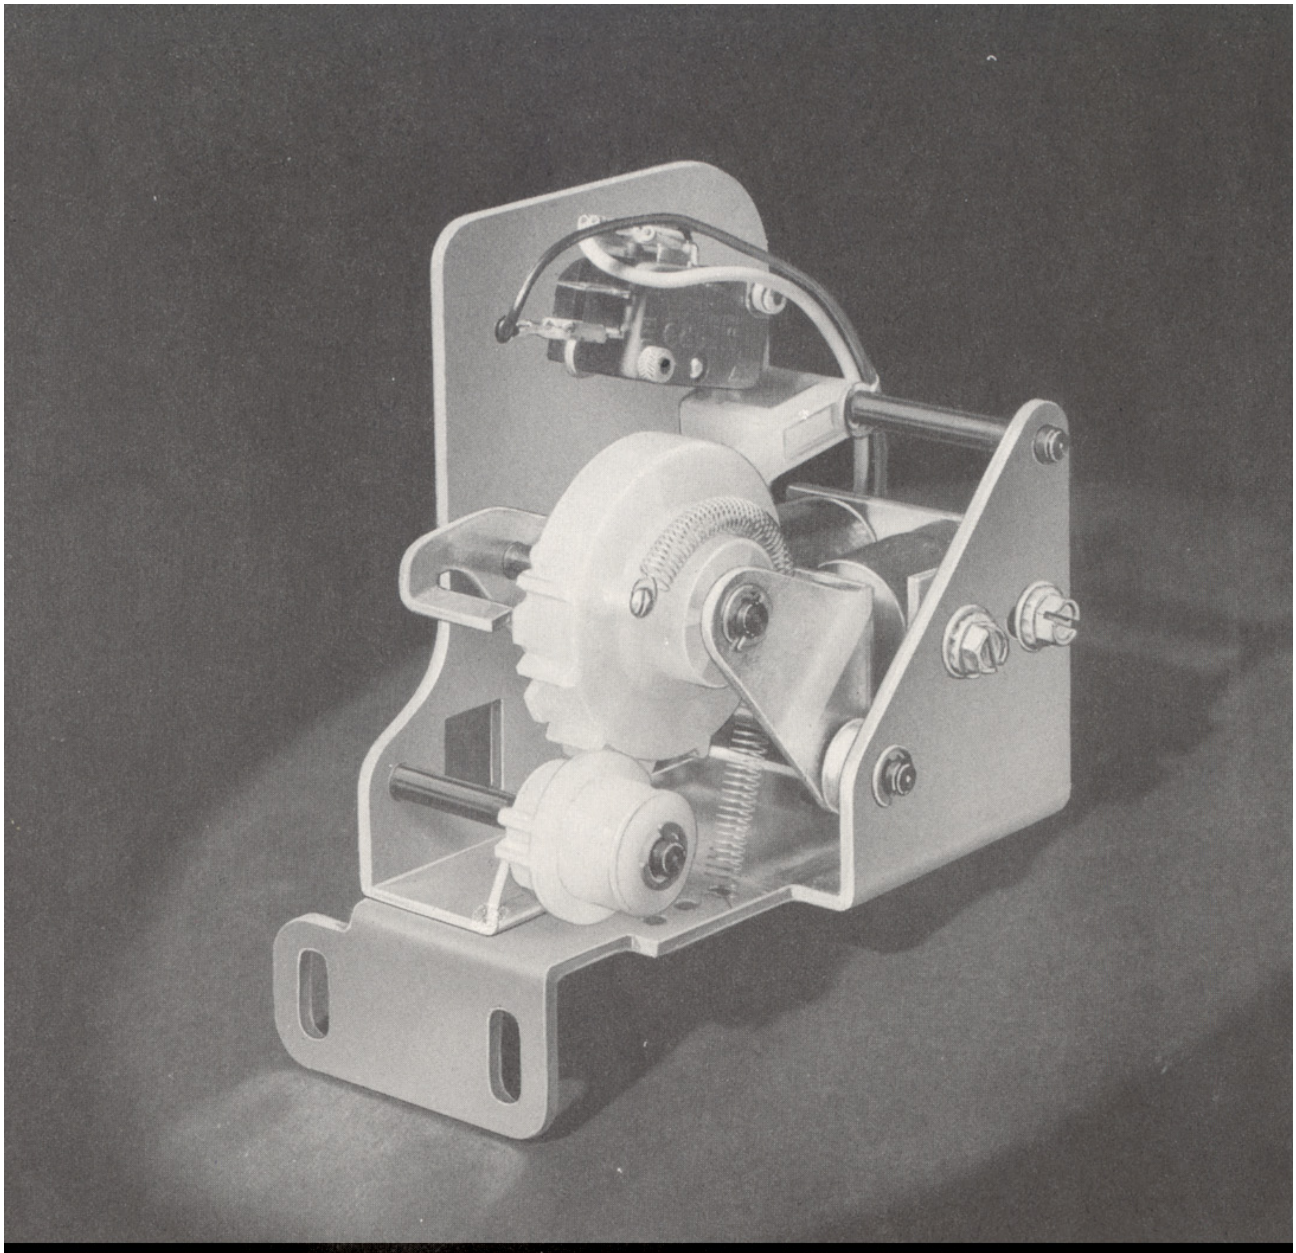

NEW FREE WHEELING TRANSFER ASSEMBLY

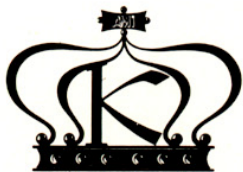

New unidirectional AC motor with positive cycling drive gear assembly for trouble-free record handling under all conditions. Free wheeling feature allows manual operation of transfer assembly for convenient servicing or inspection. Prevents binding in low voltage conditions or switch malfunctions.

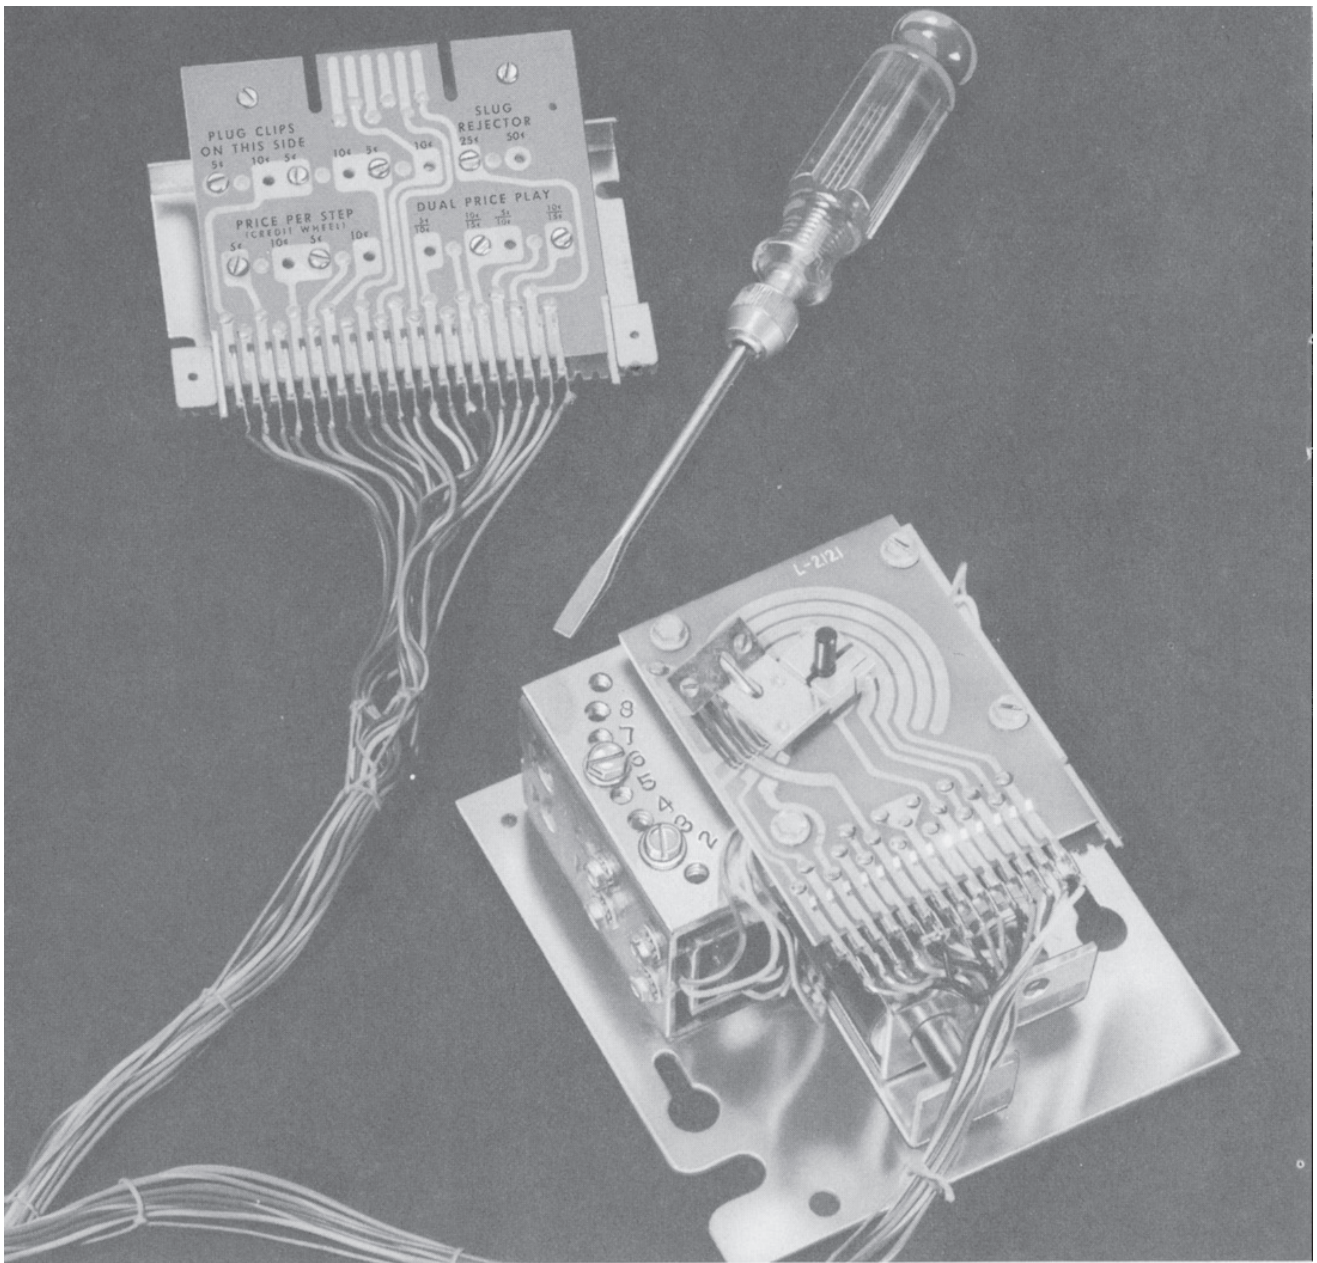

NEW TOP-MOUNTED SCAN CONTROL

Located for quick, easy-to-check inspection and fast servicing, this new Scan Control operates even when detached from the mechanism. Entire unit can be removed for testing before replacement. Quick-disconnect terminals eliminate soldering. All contacts are protected against moisture, oil, dirt and insects . . . positive action switch is enclosed and sealed.

NEW FAST CHANGE CREDIT SYSTEM

Price of play variations are virtually limitless with the Model "K". Make any credit combination by moving a few set screws. Both credit unit and circuit board are in plain view within easy reach for quick changes. Removing either or both from the cabinet is a snap, too. Quick-disconnect couplings eliminate soldering. New Credit System provides dual pricing for all "K" models, including manual selector types.

CREDIT CHANGES ARE EASY:

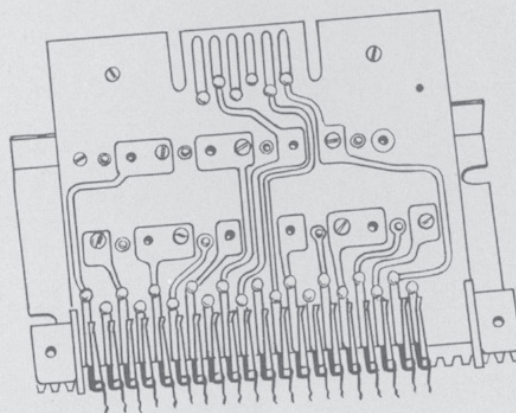

Standard single price factory setting shown left and right is for 10c per play; 3 plays, quarter; 7 plays — “half”.

Changes are unnecessary in the Credit System to convert from single to dual price play. Just place EP Switch Actuator behind desired pushbutton banks to make the change.

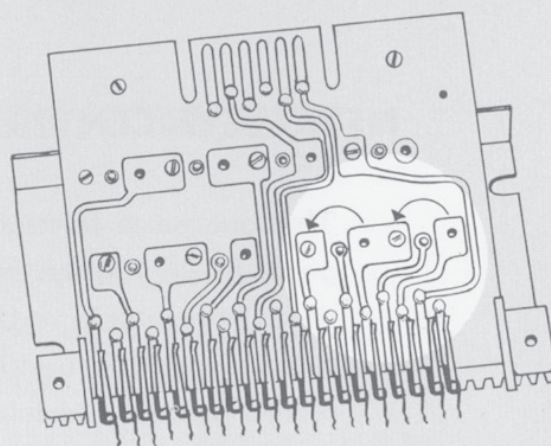

To change from the Standard Dime Setting to a typical 5c per play combination (2 plays for a dime, 6 for a quarter, 13 for a half), it is only necessary to move three screws, one on the Credit Unit and two on the Credit Circuit Board as shown at right.

Many other price of play combinations can be made with the same ease and simplicity just by moving one or two screws.

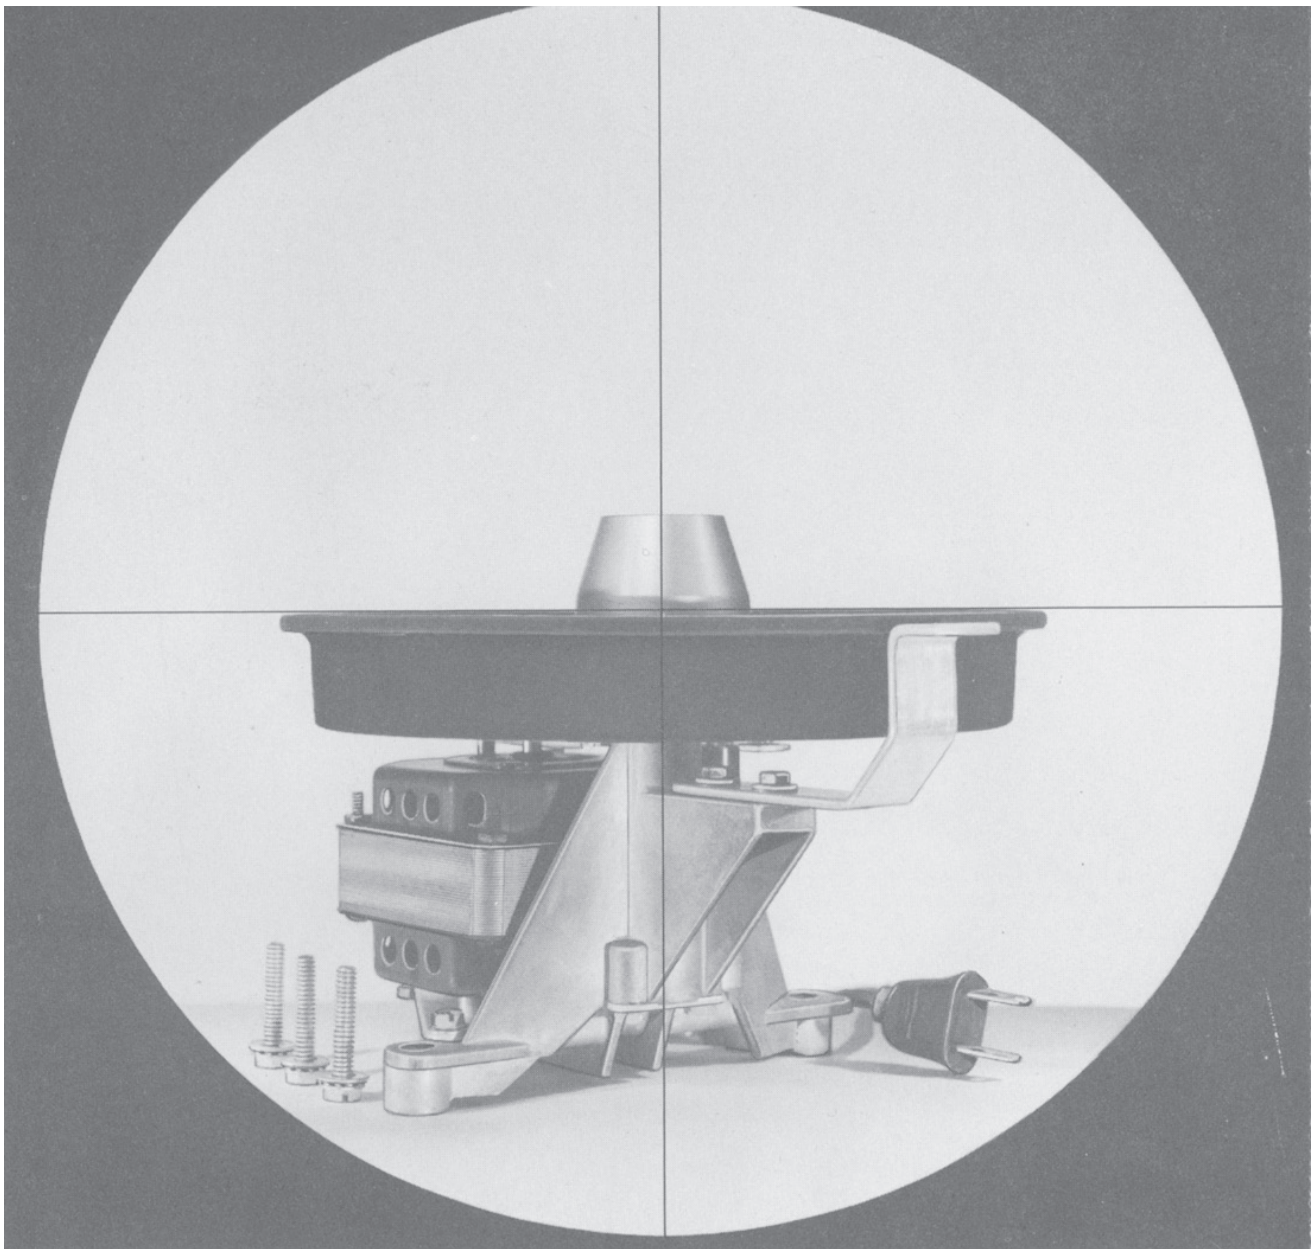

This outstanding new Credit System stores up to 30 plays or 3 dollars.

Setup for standard play
10c, 3 for a quarter, 7 for a half.

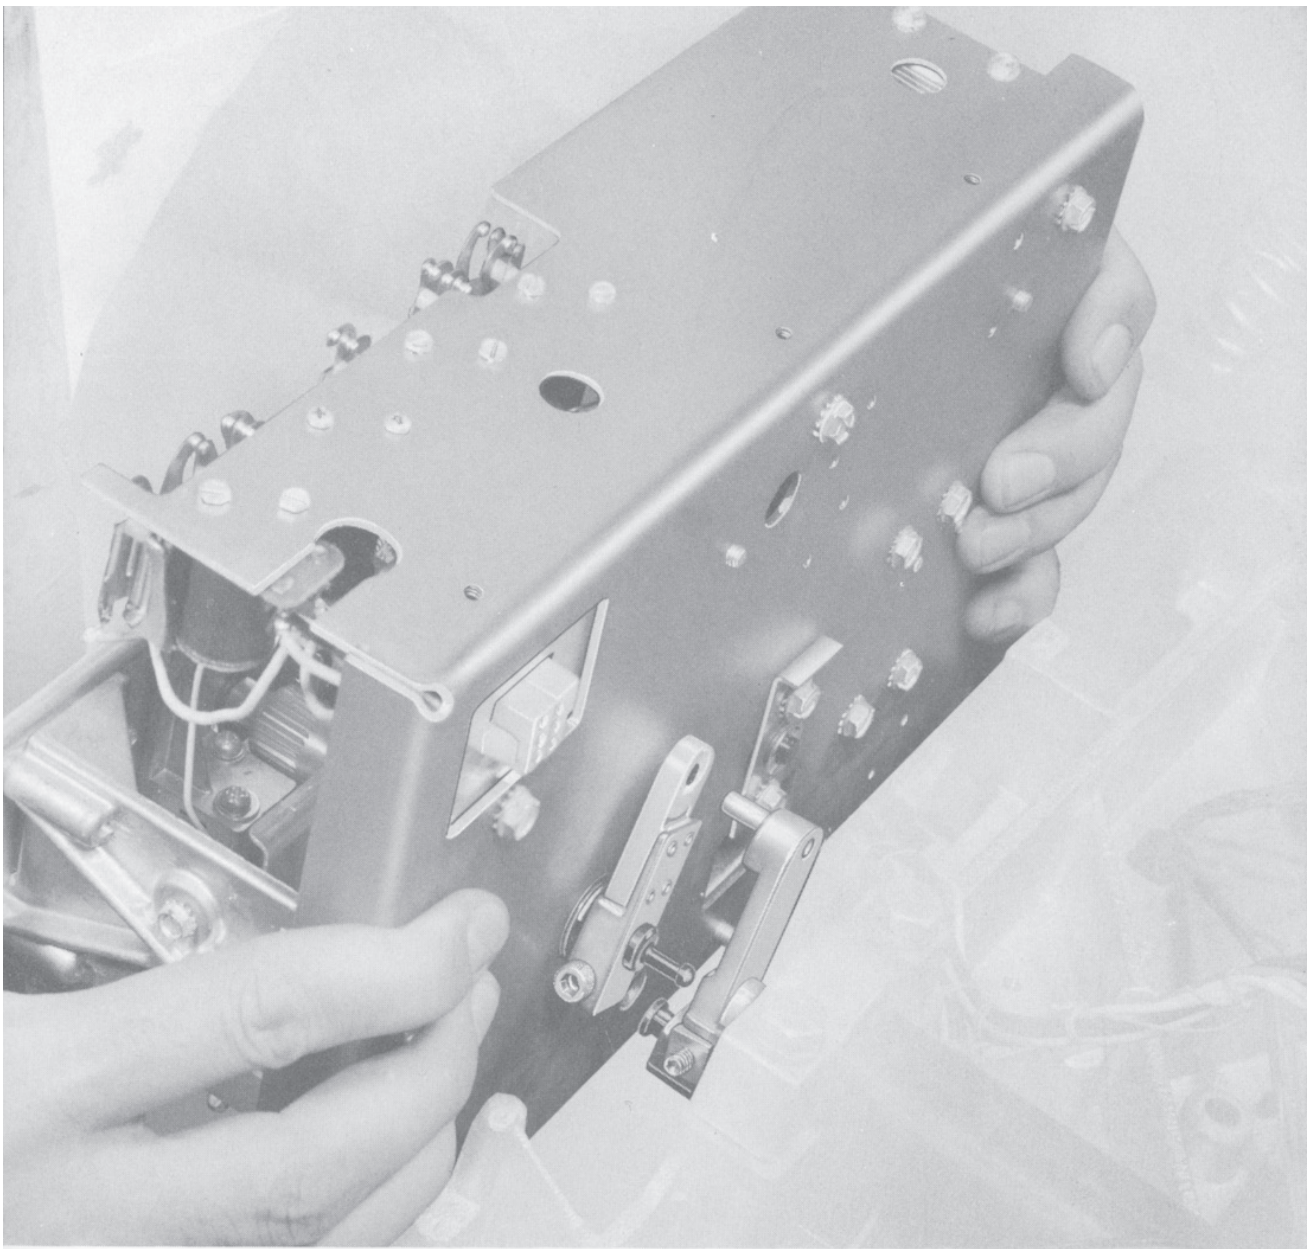

Altered for 5c per play, 6 for
a quarter, 13 for a half.

NEW, SELF-CENTERING TURNTABLE MOUNT

This one piece turntable base casting attaches to a three-point fixed position on the mechanism base to eliminate time consuming critical adjustments. The turntable mounts on this casting, automatically aligned with the record transfer mechanism, both horizontally and vertically. Another AMI time-saving advantage that ups income by cutting costs.

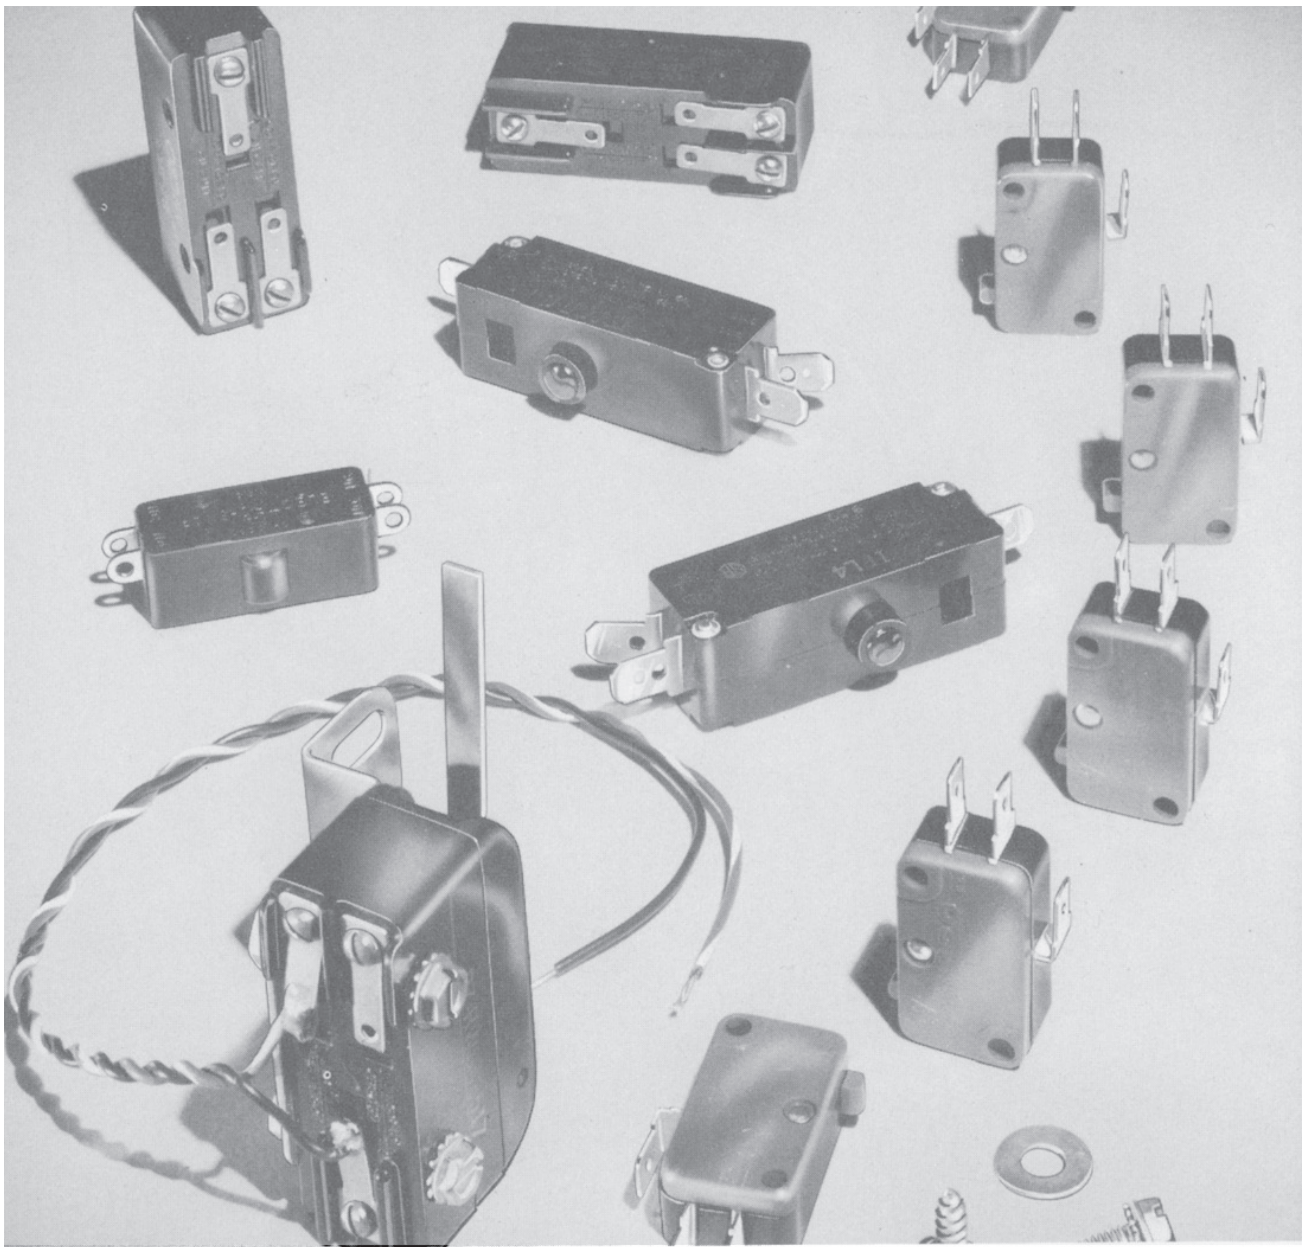

NEW SELF-ALIGNING PULSE CONVERTER

Now, the pulse converter can be attached in correct position immediately. Both removal and replacement of the unit are made conveniently from the front. Positive fool-proof coupling automatically aligns the selection mechanism with the push-buttons, eliminates selection error through misalignment, prevents player discouragement.

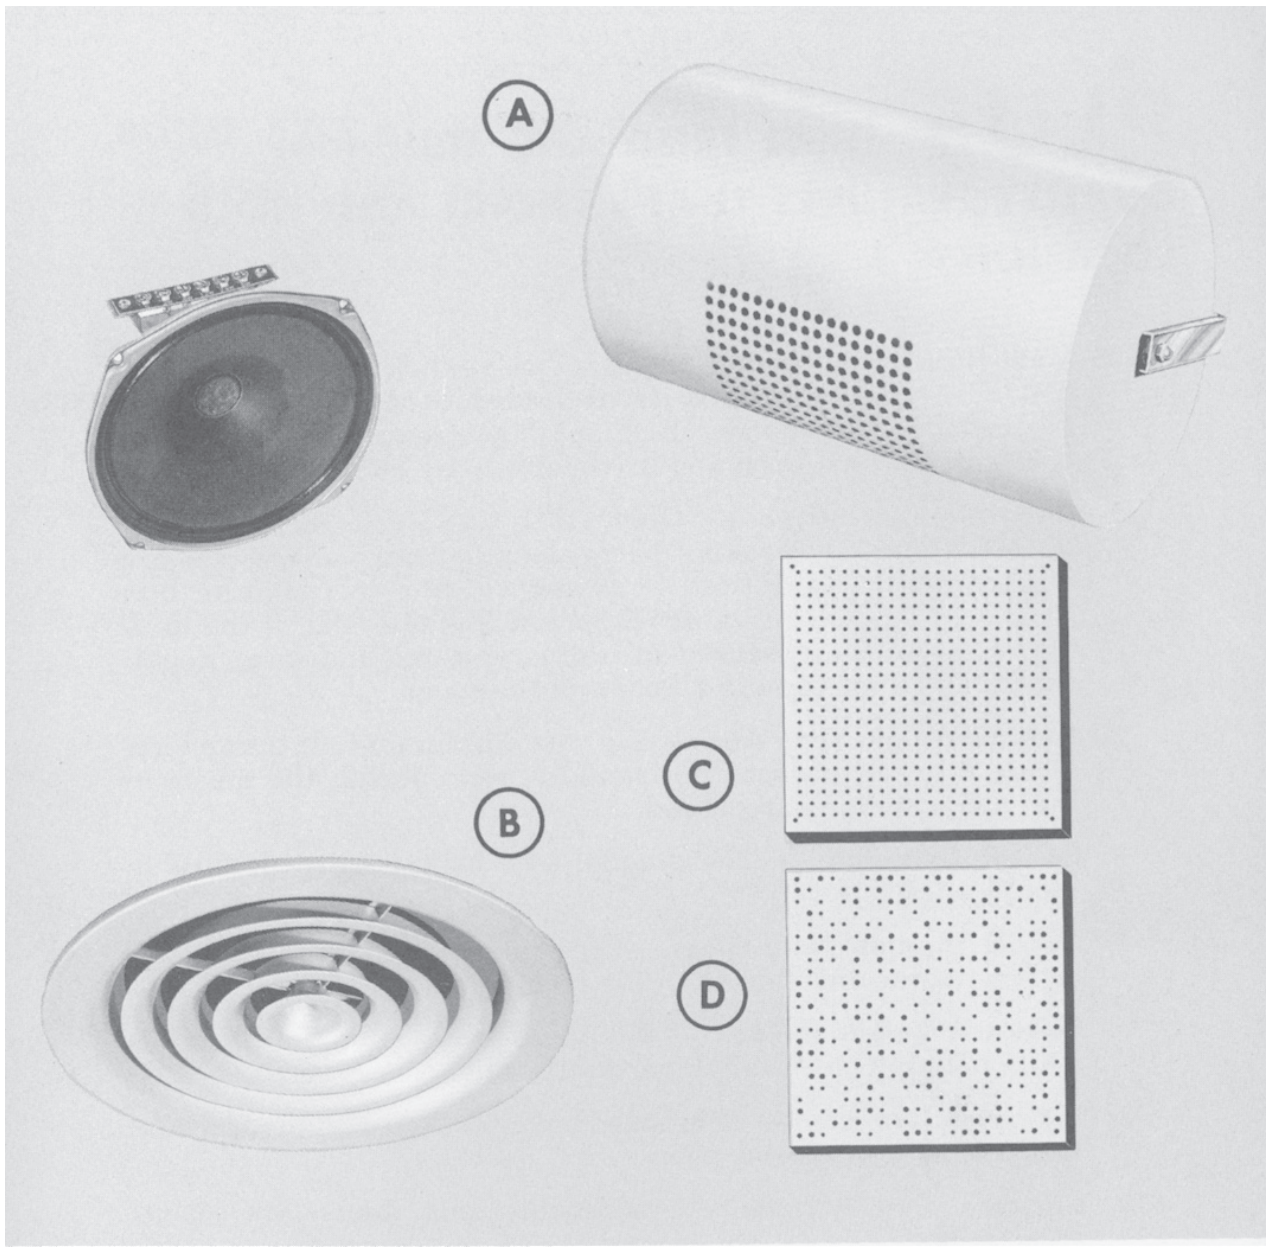

NEW ALL-ENCLOSED MECHANISM SWITCHES

Scan, toggle, cam, cut-off and stopping switches — all the mechanism switches — are completely sealed against dust, oil, insects and moisture for longer, trouble-free life. Sealed enclosure insures permanent and positive contacts by protecting them from damage at all times — when idle, in use or during servicing.

NEW REMOTE SPEAKERS

This completely new selection of remote speakers meets every monaural and stereo installation demand. New cylindrical all-purpose bass-reflex (A) adapts to walls, ceilings, corners and support posts in vertical or horizontal positions. A wide selection of flush-mount ceiling speaker grilles (B, C, D) offers new flexibility in speaker placement. Here are quality speakers at low, low cost.

PLUS THESE TRIED AND TRUE AMI QUALITY FEATURES THAT ATTRACT AND HOLD LOCATIONS

1. **Multi-Horn High Fidelity Sound.** Twelve-inch woofer with *one pound* magnet couples to front loaded horn for smooth, low frequency bass response. Brilliant high frequencies emit from compression-type horn and driver. Both are component quality.
2. **Three-Channel Stereo** — Only AMI gives you three channel stereo. External speakers carry separate channels which are electronically combined at lower volume in the juke box speaker. This exclusive development fills the hole in the middle of the music observed in ordinary stereo and gives depth, clarity and dimension in all parts of the room.
3. **Feather Weight Tone Arm** — Die cast aluminum tone arm exerts gentle 8 gram pressure horizontally, reproducing the music in the same manner as recorded.
4. **GE VR Cartridge** — The standard of high fidelity quality in stereo or monaural.
5. **Double Strength Plate Glass** — The finest glass made, "A" type $\frac{3}{16}$ " plate, for undistorted vision from any angle.
6. **Corrosion Resistant Parts** — Stainless steel, aluminum or cadmium plating is used on all parts subject to corrosion.
7. **Separate Cash Box** — Big, sturdy well-locked metal cash box. Tamper-resistant metal door.
8. **Separate Slug Rejector** — Accessible side door with cheat-proof latch.
9. **Ventilation and Vermin Proofing** — All cabinet openings heavily screened. No pest-attracting fabrics or insulation.
10. **Title Strip Availability** — Title holders snap-out easily for quick title strip changing at or away from machine.
11. **Styled to Stay New** — Clean, smart lines, attractive die-cast trims in heavy chrome and mar-resistant finishes retain the new look longer.
12. **Rigidly Constructed Cabinets** — Prime grade materials and rigid glue and screws construction keep AMI warp-resistant cabinets the finest in the business.
13. **Stereo Now or Later** — Exclusive new modular amplifier design with all-plug-in components offers convenient stereo conversion at low cost.

BUILD EXTRA BUSINESS WITH THESE AMI AUXILIARIES

200 Selection Wall Box. The built-in business builder that promotes plus play from counter and booth. Fast, single button play. Heavy hinged tamper-proof housing. Slug rejector snaps out. Quick change title strips. Fully chromed, front and back.

Heavy Duty Bar Grip. Well-styled mounting for attaching Wall Box to bars or counter tops without marring polished surfaces. Rigid aluminum casting absorbs abuse and mishandling. Style-matched to the Wall Box.

New, Remote Volume Control. Handsome new remote unit for both stereo and monaural installations offers convenient volume control and selection cancelling. New low price makes this a real value for building location satisfaction with music.
