Product Description:

The CC-16 is the most widely used and recognized gaming coin validator. It utilizes a patented magnetic induction system which provides an accept/reject decision within milliseconds, defining speed, security and reliability. Coin Mechanisms' Comparator products are the gaming industries' choice around the world.

Product Details:

- Coin feed performance rated at 7 coins-per-second
- Straight drop coin path
- Optional inhibit feature
- Proven reliable under extreme gaming conditions
- CC-16 product offered in voltages ranging from 12 volts DC to 48 volts AC
- CC-16 designed for coin diameters of .700" (17.8mm) thru 1.478" (37.5mm) (Wide Body model recommended for coin diameters up to 1.95" (49.5mm))
