Software Application Downloads (Gaming Industry)

CRC Signature Verification Tool   **v1.00**   **207kb**

This application can be used to view firmware versions presently installed in the bill validator and to calculate/compare the CRC signature on a DBV-200, WBA-12/13, UBA-10/11, and UBA-14 bill acceptors. (The actual binary file is needed for this setup).

ID003 Driver Basic   **v1.3**   **226kb**

This application allows the complete communications testing of a JCM Validator using a PC as a host. This application is specific to the ID003 protocol. See the Basic Driver Documentation for details on running and using the Basic Driver program (included in the ZIP file).

ID024 Driver Basic   **v1.04**   **63kb**

This application allows the complete communications testing of a JCM Validator using a PC as a host. This application is specific to the ID024 protocol. See the Basic Driver Documentation for details on running and using the Basic Driver program (included in the ZIP file).

TicketCop: Barcode Evaluation Software   **v1.0.11**   **8.57mb**

This application is intended to aid Barcode Ticket designers in making new tickets that will have high acceptance in JCM acceptor equipment. The TicketCop software tests barcode tickets in 5 important ways (Barcode Value, Length, Amplitude Level, Low Transparency Point, and High Transparency Point) for acceptance with the current JCM ticket acceptance standards.

UBA, WBA AccLoad   **v1.19**   **372kb**

This application can be used to view acceptance and denomination information from the UBA-10 and WBA 12/13 bill acceptors.

WBA/DBV Download Application   **v1.24**   **228kb**

This application will download a data file from a PC to the WBA/DBV validator for software upgrade purposes (also has version check feature).

UBA Downloader (Vista Compatible)   **v3.02**   **4.21mb**

This application will download a data file from a PC to the UBA validator for software upgrade purposes. This version is now compatible with Windows Vista and is backwards compatible with Windows XP.

UBA Installer   **v1.2**   **996kb**

This application will upload the data files from a PC to a PocketPC for software installation to the UBA validator.

UBA-1x Sensor Adjustment Tool   **v2.10-06**   **417kb**

This application is used for UBA-10/11-SS sensor adjustment.

UBA-x4 Sensor Adjustment Tool   **v2.10-06**   **422kb**

This application is used for UBA-14/24-SS/SU sensor adjustment.

USB Tool Suite   **v1.06**   **5.8mb**

This application allows the user to utilize the front USB port on UBA Validators for Downloading software, Accessing ACC load files and also calibration.

WBA 1x Sensor Adjustment Tool   **v1.0**   **365kb**

This application is used for WBA 12/13 sensor adjustment.

WBA 2x Sensor Adjustment Tool   **v1.0**   **371kb**

This application is used for WBA 20/21/22/23 sensor adjustment.

Software Application Downloads (Commercial Industry)

DWN03   **v2.07**   **53kb**

This application is used to force download the DBV-3XX. When downloading DBV-3XX using PSP03 Program Download and the process was interrupted while in download process, the firmware in the unit will be corrupted. Must use the force download application to re-flash the unit.

Palm A-66   **v3.40**   **434kb**

View the currently installed software in the A-66 coin changer and to diagnose the unit.

Palm Flash   **v4.10**   **63kb**

This application is used only for loading software or to change the software on A-66 coin changer.

Palm Stat   **v1.40**   **26kb**

Tap on the upper left corner of the PALM and choose "See Data" to browse on the captured data from the coin changer.

PSP-04   **v3.4.0**   **38kb**

If a program download failed before completing the download, you must use DWN-03 and set the dip switches to be able to re-download the software to the unit. The DWN-03 firmware application information contains the dip switch settings.
